

INCENTRA AND HITACHI

Helping you maximize your storage investments.

Companies of all shapes and sizes are watching their data grow at exponential rates. Furthermore, they're spending millions of dollars on technology upgrades and maintenance to address issues of data growth, server utilization, information access, power consumption, and regulatory compliance. But are they getting the full value from their storage investments?

Incentra combines consulting, technology, and outsourcing services to help you properly deploy and manage your storage infrastructure. By combining the power of Hitachi's acclaimed storage solution with our operational and technical expertise, you can reduce management costs and improve performance.

Whether your strategy includes storage area networks (SAN), network attached storage (NAS), hierarchical storage management, or data archiving, we help you consolidate and manage data to ensure a positive return on your storage investment.

Regardless if you use us selectively or comprehensively, we will help you receive the most benefit from advanced storage technologies. Through our proprietary solution, GridManage Disk / Storage, our expert administrators manage your environment to specific business needs identified during the storage usage assessment of your infrastructure.

GridManage Disk / Storage includes:

- Dedicated storage administration with zoning, mapping, updates, and upgrades
- Professional services to optimize your storage infrastructure
- 24x7 event monitoring from our Network Operations Center (NOC)
- Proactive health monitoring with infrastructure performance metrics
- Ongoing management discussions

Our experts can help ensure your disk array performs at the highest level.

Realize the full impact of your IT investments

Through our unique combination of consulting, technology, and outsourcing services, we help you maximize every dollar invested in your IT. Whether you use us selectively or comprehensively, we will leverage the full breadth of our experience to help you meet your specific business needs – efficiently and cost-effectively.

Consulting – Our consulting services help you understand your business needs, provide visibility into your infrastructure, and give you specific recommendations and action plans to achieve your goals.

Technology – As a single source for your data center technology needs – from servers and storage to networks and security – we provide a better technology experience. From more than 100 leading brands, we'll help you select, install, and support your data center technologies at competitive pricing.

Outsourcing – Our customized outsourcing services address your specific needs for performance, cost, and reliability. We manage server, network, storage, and security solutions 24x7 to ensure your IT investments are optimized. Reduce your cost and risk of IT infrastructure operations by leveraging our toolset, people, and processes for continuous improvement.

Best-of-breed storage platform.

The Hitachi TagmaStore™ Adaptable Modular Storage (AMS) Model 2000 delivers the best performance, availability, and scalability for the price.

The AMS2000 offers a highly scalable, reliable, and cost-effective platform for major business applications, tiered storage, storage system consolidation, NAS applications, new SANs, critical backup, and data archiving.

Why should you choose Incentra?

We deploy solutions that manage storage costs, while ensuring reliability, scalability, and flexibility. Once we've helped you select the best platform for your needs, our expert administrators focus on maximizing performance and asset utilization. Keeping your storage running properly is our main priority.

We tailor storage solutions to meet your unique needs and budget – and may include some or all of these components:

- Enterprise storage
- Server consolidation
- Data containment
- Data management
- Data protection

How can Incentra impact your IT?

- Effectively utilize your storage assets
- Ensure you're not wasting money with pay-as-you-go capacity and administration
- Receive 24x7 monitoring and administration without capital investments or additional headcount
- Enjoy increased visibility into your managed assets – so you always know what's going on with your data
- Reduce operating expenses
- Resolve incidents faster

Whether you're consolidating storage solutions, engaging in new technology platforms, or creating a SAN, our experts can help ensure your disk array performs at the highest level. To learn more, visit us online at www.incentra.com.
